DETAILED ACTION

This Office action is in response to the election received December 24, 2003.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preamble of claims 1-15 is misdirecting and confusing such that the intended preamble recites a "bistable molecule", however the claims as recited proceed to recite a multiple electrode device having a bistable molecule as one of the components in the device.

Correction is necessary to recite the intended invention, either the multiple electrode device having a particular bistable molecule or the bistable molecule itself.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. HEALTH et al recites a molecular based switching device, while BRATKOVSKI et al recites a mechanical device having a bistable molecule. BRATKOVSKI et al fails to explicitly state that the bistable molecule in the device possesses a photosensitive functional group.
